

Master Phone Manufacturer List

Updated: 22 April 2010

This is a list of phones that either we have tested; WeGolf users have advised they work or, used information from the manufacturer.

This list is constantly changing as manufacturers are releasing new models all the time. Some models may not be available for sale in Australia. Phone specs are provided by the manufacturer and WeGolf is not responsible for any errors. If you cannot find your phone on the list send us an email and we will check to ensure what features it supports.

NEWS FLASH!

WeGolf has just released a new version for iPhone and Android model phones; we have also released an upgrade for BlackBerry phones.

The iPhone version is currently available for download at a special introductory price ***only through the App Store***. There is no Free Trial version available for the iPhone or iPad.

The version released is only compatible with iPhone and iPad touch using the iPhone OS 3.1.3 or greater.

Fifty five (55) new Android model phones have been added to the list. To download WeGolf for your Android model phone, you will need to open the Android Market on your handset. There is a Free Trial available from the Android Market.

The Three (3) Categories:

WeGolf offers a Free Trial so that you can test any phone without charge for 14-days with unlimited usage. ***We highly recommend that you take advantage of this offer.***

Unless a phone is listed in either Category 1 or 2, it is deemed to be Category 3 and incapable of providing GPS distance with WeGolf.

1. ***Category 1:*** these phones have built-in GPS and use ***all*** WeGolf functionality
2. ***Category 2:*** these phones do not have built in GPS but are capable of using ***all*** WeGolf functionality ***when*** combined with a separate Bluetooth GPS receiver WeGolf does not endorse a specific Bluetooth GPS receiver but do have a few in stock that will work with Category 2 phones (contact admin@wegolf.com.au for more information).
3. ***Category 3:*** these phones may provide only ***basic*** WeGolf functionality which includes the scorecard, statistics and *LiveScore*. They ***will not*** display the GPS distance to any point of interest (POI).

Phones that do not work!

WeGolf does not work on the following phones:

Palm Pre

Windows Mobile Phones
